## Operator Check Sheet <br> Micro-Granular Applicator

| Owner: | Operator: |  |
| :--- | :--- | :--- |
| Make: | Model: | Serial No. |

## Checklist

MechanicalGuards incl. PTO guard secure and undamaged
$\square$ Machine attached to tractor securelyApplicator attached to machine securelyStructural wear and corrosion

## Hoppers

$\square$ Securely fixed in frameFree from leaksBungs and seals in good conditionHopper lid undamaged
$\square$ Enclosed transfer system in good condition
Outlets (fishtails, splash plates)
$\square$ Outlet positioning correct
$\square$ Outlet body orientation correct
$\square$ outlet opening unobstructed

## Pipework

$\square$ Pipes and fittings in good condition
$\square$ Free from leaks

## Land Wheel

$\square$ Check for wear/damage

## Boom

$\square$ Correct outlet height across the boom
$\square$ Boom alignmentBoom suspension workingBoom break-backs working

ㅁCheck mounting points and linkages for wear
$\square$ Properly secure when folded for transport

## Pneumatic system

$\square$ Free from leaks
$\square$ Condition of fan

Function of venturi
$\square$ Check airflow at each outlet

## Controls and valves

$\square$ Master switch working
$\square$ Section controls working
$\square$ All controls labelled

## Checklist

Metering SystemMetering unit drive working correctlyDrive pulleys/sprockets in good conditionShafts alignedMetering unit in good conditionCheck clearance gap
Output Checks
Calibration

## Product:

Application Rate:
kg/ha

Automatic calibration (dump test)

| Expected $\mathbf{g}$ | Actual $\mathbf{g}$ |
| :--- | :--- |
|  |  |
|  |  |

## Dynamic calibration

Application rate $(\mathrm{kg} / \mathrm{ha}) \times$ row/outlet width $(\mathrm{cm})=\mathrm{g} / 100 \mathrm{~m}$ of row 10

| Outlet No. | Output (g) |
| :--- | :--- |
|  |  |
|  |  |
